- Qualified experienced operators

### Operation

“Bambra” is a twin screw diesel driven multi tug support vessel for the Sea Lift Barges. “Bambra” provides safe crew access to and from the barges, ideal vessel to move our jack up barges and for the transportation of equipment to and from the barges whilst working on projects.

The “Bambra” is fitted with an A frame, winches and Hiab style deck crane for over water work and extra support for our jack up barges undertaking construction projects.

The full suite of navigational support equipment, GPS Plotter, Depth Sounder and Radio gear provides optimum safety for the crew and operations.
